

PRODUCTION BRIEF

Accenture Division	TMW, Accenture Song
Project	Ford Dealer Website Pages Proof-of-concept
Brief Author/Owner	Diane Appiah, Business Director – Ford Motors
Brief Date	5 August 2026
Budget	BD budget
Timings	24-Aug latest for Proof of concept

BACKGROUND - Please provide a top-line summary including the aim of the brief and relevant brand info	
- TMW has been working with Ford GB on strategy to centralise paid search and standardise dealer web pages across approximately 190 dealer sites. The vision modelled on BMW's content framework is a consistent, OEM governed digital real - estate where Ford can see Search performance across the full dealer network for the first time. - At the moment, there are some key compounding problems that make the current model inefficient:	
Poor landing CX	Paid clicks route to dealer-built sites with inconsistent UX, slow load times and no consistent journey — money wasted on every bounce
Dealer cannibalisation	Dealers in overlapping catchments target the same keywords, inflating CPCs with zero net gain — paying to beat each other, not competitors
No Ford OEM visibility	Ford cannot see cross-network search performance, conversion data or audience signals — no ability to optimise nationally or inform strategy
Inconsistent CX	A customer searching 'Ford Puma near me' sees a completely different brand experience depending on which dealer they land on — eroding trust and losing consideration

PRODUCTION BRIEF

THE OPPORTUNITY

Ford dealer sites	> 190 nationwide
Current state	Every dealer runs their own site — no central CMS, inconsistent UX, dealer cannibalisation of paid search
The vision	Standardised dealer pages built on a Fixed / Flexible / Free content model , underpinned by centralised paid search
Benchmark	BMW Group 1 — live proof of concept (see reference sites below)
Client deadline	Mid-August 2026 to present costs and plan for FY27 budgets

THE BRIEF

1. **Build a static Next.js site aligned to the long-term Ford vision, with an AI agent managing content updates. The objective for our proof-of-concept stage is to avoid the Contentful procurement and integration cost for the proof of concept, while demonstrating the end-state experience for Ford as per the below:**
 - Up to 5 pilot dealer pages built from a single next.js template
 - Next.js framework hosted in Vercel
 - AI agent handles content updates – no CMS required at this stage
 - Fixed/Flex/Free content principles baked into the template structure. This matters even for static pages so the template is built for the full vision, not just for the proof-of-concept.
 - **Below are 5 Ford dealer site links** to begin the proof-of-concept and demonstrate the performance gap our standardised template will close. See sites below that represent the range of inconsistency across large Ford dealer groups, regional dealers and Ford-owned:
 - **Lookers Ford** - www.lookers.co.uk/ford
 - **Evans Halshaw Ford** - www.evanshalshaw.com/ford
 - **Allen Motor Group Ford** - www.allenmotorgroup.co.uk/ford
 - **Group 1 Ford** - www.group1auto.co.uk/ford

PRODUCTION BRIEF

- **BMW Benchmark reference sites:**
 - Group 1 BMW Brighton - www.group1brightonbmw.co.uk
 - Group 1 BMW Reading - www.group1readingbmw.co.uk
 - Group 1 BMW Borehamwood - www.group1borehamwoodbmw.co.uk
 - Group 1 BMW Bedford - www.group1auto.co.uk/dealerships/bmw/bmw-bedford
- 2. Please provide the following to build the static next js dealer pages with AI agent content management:
 - **Proof-of-concept cost** – to build the static next js dealer pages with AI agent content management:
 - **Proof-of-concept timeline** from now to working demo – two weeks ambition
 - **Scale cost** – Indicative Vercel hosting cost for >190 sites alongside Contentful
- 3. **If stage 1 demonstrates measurable uplift in Search performance and lead quality, the plan is to scale the programme to the full dealer sites. Contentful as the CMS with Vercel remaining as the hosting and front-end leveraging the strategic partnership.**

TIMINGS

- Please share project plan for proof-of-concept completion for 1-2 weeks turnaround
- Please flag any capacity issues as early as possible.

BUDGET

- This proof of concept is being produced on BD budget as part of our Ford Learning Lab proposal.
- There is no client production budget allocated for this phase.
- Please flag costs for POC before starting
